Revenue Share by Category

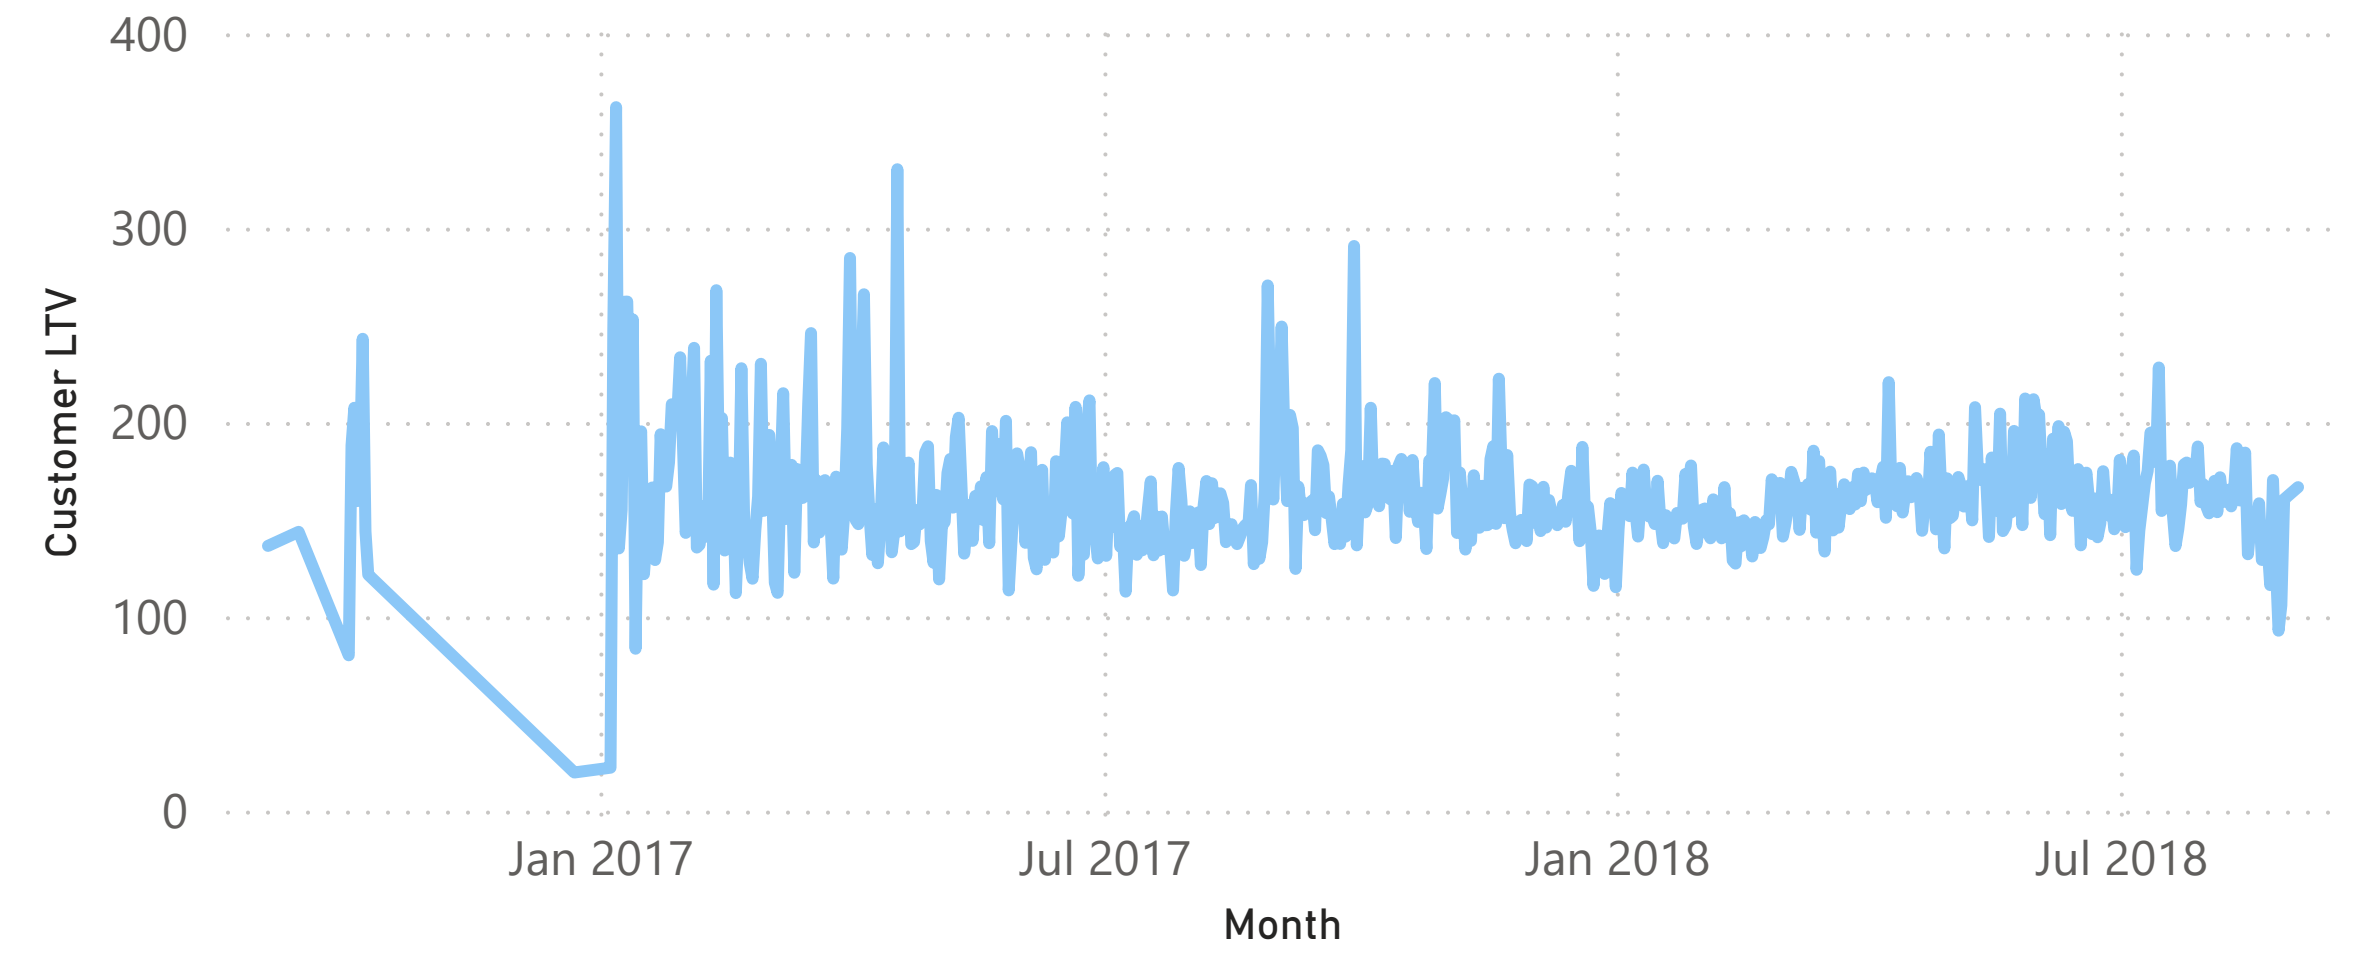

Top product categories contribute the majority of revenue, indicating a Pareto (80/20) distribution. Focus on high-performing categories for growth while improving underperforming ones.

Customer Insights

Monthly Customer Acquisition

Customer LTV Over Time

Customer retention is relatively low (~3%), indicating most users are one-time buyers. Customer growth is steady, but improving retention could significantly boost long-term revenue. Strategies like loyalty programs or personalized marketing could help increase repeat purchases.
